Company Profile

About Dalton Pharma Services

Dalton Pharma Services is a privately-held pharmaceutical services company that has been producing Fine Chemicals on a custom basis for research and chemical supply houses for over twenty-five years (Fluka, Aldrich, Sigma, Acros). We have identified and supplied many new reagents for biological and pharmaceutical applications, this includes novel analogues and impurities of active pharmaceutical ingredients, as well as new linkers. We are leaders in process development, process improvement, and in the field of isolation of kilo quantities of biologically active molecules from natural sources.

Dalton excels at advancing projects from R&D into GMP environments for its customers. With the ability to manufacture cGMP API's from bench scales to multi kilos we can meet most clinical and small scale commercial requirements. We also offer the rare ability to produce sterile APIs for aseptic processing in our sterile suites.

We pride ourselves on being able to reliably deliver an integrated full service offering all the way from discovery support to the production of sterile injectable finished doses.

We continue to add to diverse catalog of compounds available from our inventory of standards and impurities. All of our high quality compounds are manufactured and shipped from our North American facilities directly to you.

We serve a diverse group of customers including private and public laboratories, research institutes, university research labs, clinical research organizations, pharmaceutical manufacturers, analytical testing laboratories and many more.

Our staff bring years of experience as synthetic organic chemists and have a proven ability to efficiently manage a wide variety of complex chemistry and biotechnology projects.

Company Profile

- 42,000 sq ft facility in the Greater Toronto Area
- Adjacent to Toronto's York University
- Close proximity to Toronto area pharma, biotech, medical research facilities
- Secure, controlled environment
- Integrated synthesis laboratories
- Over 60 employees:
 - 25 at Ph.D. / M.Sc. level
 - cGMP API manufacturing suites
 - Health Canada/EU Approved Site
 - Analytical laboratory
 - Research library
 - cGMP Sterile injectable manufacturing
 - Solid encapsulation production

Our Services

- Contract Research
- Custom Synthesis
- Process Development
- Medicinal Chemistry
- Contract Analysis
- cGMP API Synthesis
- Sterile Filling
- Formulation Development
- Stability Studies
- Conjugation Chemistry
- Commercial Manufacturing

Custom Synthesis Services

Our Strength is Chemistry

Extensive Experience across a wide range of structural classes

Custom synthesis of small molecules and fine chemicals is central to small molecule screening and small molecule drug development. Operating under GLP, cGMP or non-GMP conditions and utilizing reactors up to 100 L, we specialize in the custom synthesis of a wide range of small molecules including active pharmaceutical ingredients, pharmaceutical intermediates, drug intermediates, drug metabolites, drug analogs, analytical standards, reference standards and certified reference materials, chemical intermediates, chemical standards, and pharmaceutical impurities.

Proprietary information and IP rights are fully respected

Contract Research Services

- Our chemists become an extension of your own resources
- Process optimization / route development / scale-up / synthetic feasibility
- “Rent-a-chemist” or “Fee-for-service” models
- Legal cases / expert witness

Medicinal Chemistry Services

- We identify new chemical entities for your drug discovery / development program
- Can perform either hit-to-lead identification or drug optimization services
- Flexible deal structures (Straight FTE or FTE with milestones / royalties)

Process Development & Scale-Up Services

Our extensive experience in synthetic organic chemistry, including complex chemistry, chiral compounds, hydrogenation, natural products chemistry, organometallic chemistry, nucleotide and amino acid production, stable isotope synthesis, fluorescent probes, and inert atmosphere chemistry, and our ability to work with most drug classes including Steroids, Opioids and Cannabinoids, allows us to deliver highly specialized outputs meeting the needs of our customers. We excel in process development, process improvement, and in the field of isolation of kilo quantities of biologically active molecules from natural sources. In addition, Dalton's custom synthesis department is supported by a full analytical chemistry laboratory (MS, NMR, HPLC, FTIR, LC/MS, Karl Fisher, etc.).

Dalton's chemists enjoy being challenged by difficult chemistry problems and look forward to solving them. We stand by our products, which are manufactured to the highest quality standards.

Contract Analytical Services

We have built high quality in-house analytical laboratory capabilities to support the development and manufacture what we make as well as for stand alone analytical testing. We also prepare and qualify pharmaceutical analogues, cold isotopic labeling for Metabolites, drug impurities analytical standards, reference standards, and pollutant impurity standards in our laboratories for purchase.

Our contract analytical lab services include:

- **Analytical Chemistry Services**
- **Analytical Development Services**
- **Accelerated Stability Services**
- **Microbiology Services**

Our Contract Analytical Testing Laboratory has a high level of expertise in analytical method development, optimization, and validation for both synthetic organic compounds and for natural products. Our Analytical Chemistry Department has established a variety of analytical techniques and our laboratories have the following analytical services capabilities and instrumentation:

- Liquid chromatography mass spectrometry LCQ Classic, LCQ Duo with Electrospray Ionizer (ESI), LCQ Deca
- HPLC Diode-array UV, variable wavelength UV, conductivity detection and evaporative light scattering detection (ELSD)
- GC Flame ionization (FID) and thermal conductivity detection (TCD) and headspace techniques (USP-OVI)
- Spectroscopy UV / Visible, Infrared (FTIR), LC-MS, Nuclear Magnetic Resonance (NMR)
- Mastersizer 2000
- Polarimeter
- Oxygen Headspace Analyzer
- Differential Scanning Calorimetry (DSC)

Analytical Services

- Pharmaceuticals & Biopharmaceuticals
- Small Molecules
- Botanicals & Herbs (NHPs)

- cGMP, GLP-compliant
- Health Canada License for drug testing
- Complete Documentation for Regulatory submissions in the US and Canada
- Highly controlled quality systems
- Validation to ICH guidelines
- State-of-the-art instrumentation
- Quality audits are welcome
- SCC certification

Analytical Development

Dalton develops analytical methods and validates them for drug substance as well as drug product. We fully characterize your molecule and develop robust analytical methods that help ensure the quality of the products we produce and test.

- Method Qualifications
- Stability Indicating Assays (Stress Degradation Studies)
- Assay and Impurity Validations
- Product characterization
- In-process, bulk and drug product release testing

Tailored to meet your specific needs and timelines

Dalton Standards and Impurities

- Gram / kilo / multi-kilo scales
- Small molecules & peptides
- 3 cGMP suites
- Strict environmental & regulatory control
- PC, Phase I, II, III, and commercial production
- Sterile Vials and Pre-Filled Syringes
- Sterile powder fills

cGMP Active Pharmaceutical Ingredient (API) Manufacturing Services

With a cGMP API manufacturing facility, Dalton can support the Drug Discovery process through API Synthesis for all the stages of clinical trials. We conduct cGMP manufacturing of API's from bench scale to multi kilos and offer sterile production of APIs to support aseptic requirements.

Sterile Dose Manufacturing

Dalton's GMP Aseptic Filling capabilities include aseptic filling of liquid-in-vial injectable drugs and terminally sterilized liquid products. Dalton can also produce sterile pre-filled syringe products from clinical to small commercial scale. Our sterile filling facilities include two sterile vial filling lines and one syringe filler to meet our customers needs. Uniquely, Dalton also has the capability to manufacture clinical materials as sterile powder in a vial.

Formulation Development

Preformulation

Pharmaceutical pre-formulation is a stage of drug development during which the physico-chemical properties of the Active Pharmaceutical Ingredients (APIs) are characterized. We utilize comprehensive analytical testing to fully characterize your molecule and allow us to effectively formulate the product. At Dalton Pharma Services we recognize the importance of our clients' requirements to develop robust formulations. Dalton offers extensive pre-formulation studies needed to efficiently select and advance robust dosage formulations. Our goal is to rapidly develop manufacturable formulations for our customers, while minimizing costs and timelines

Working with our clients we evaluate the a wide range of parameters when developing and manufacturing certain dosage forms, including the following.

- Solubility in different media and solvents, and excipient selection
- Dissolution of the active pharmaceutical ingredient (API)
- Accelerated stability services under various ICH conditions
- Solid state properties (polymorphs, particle size, particle shape etc.)

Services/Capabilities

- Formulation development for new chemical entities (NCEs)
- Optimization of existing formulations
- Process development of selected dosage forms
- Novel formulations for improved delivery of existing dosage forms
- Controlled or sustained release formulations
- Self-emulsifying drug delivery systems
- Colloidal drug-delivery systems
- Sub-micron and nano-emulsions

Liposomal Formulations

Over 10 years of experience gained through multiple projects

Activities:

- Formulation Development
- Manufacturing by extrusion
- Manufacturing by batch processes
- Lyophilization cycle development
- Optimization of existing formulations
- Manufacturing, formulation and analysis
- Aseptic Processing or Terminal Sterilization
- Synthetic Liposomes from natural or synthetic lipids
- Extraction and formulation of naturally occurring liposomes (bilosomes)

Liposomes

Lipid based drug formulations are increasingly being utilized as an attractive strategy to improve the bioavailability or selectivity of molecules in the body. The proven safety of liposomes as drug carriers makes them appealing candidates for a variety of pharmaceutical applications formulations including oral, parenteral, topical and ophthalmic administration.

Dalton's formulation development experience includes liposome formulations of small molecules, proteins and peptides by a variety processes.

Why Choose Dalton's Standards and Impurities?

- All Dalton's **Reference Standards** are **manufactured on-site** in Toronto, Canada in our GLP facilities using high quality raw materials (some cGMP products available).
- Regulatory paperwork for DEA and Health Canada **controlled materials**.
- **DEA / Health Canada exemptions** may be available reducing storage, and distribution challenges.
- Dalton's GLP facilities are **Canadian Standards Council (SCC) approved**.
- Dalton Pharma Services has **decades of experience** supplying the industry with high quality fine chemicals.
- Standards available **individually or in kits**.
- Calibrated Reference Standards **available in both neat (powder/oil) form, or solutions** .
- **Retest dates** instead of expiry dates provided for all reference standards.
- **High quality** reference standards supplied with lot-specific certificates of analysis.
- **Lot-to-lot consistency** regulated by rigorous product specifications and quality control SOPs.
- **Expert Technical Services** available at your fingertips with years of experience in the production and supply of analytical standards and reference materials.
- We can provide **Custom Standards** if the standard you need is not available from our stock products, according to your desired specifications.

Dalton's Reference Standards

cGMP Certified Inventory Compounds

At Dalton, we also offer an array of cGMP-certified APIs, excipients and diagnostic reagents available for sale from our inventory. The synthesis of these small molecules and biopolymers is carried out in our modern cGMP API manufacturing facility. Our clean suites are rated at Class 10,000, whereas most API suites are either un-rated or are only at the Class 100,000 level. Sterile injectable fills are completed under localized Class A.

For over 25 years, we have been dedicated entirely to providing high quality products and services to our valued clients including: custom organic synthesis; process development and scale-up, cGMP API manufacturing, sterile fill, formulation development, analytical services; custom packaging; and management of client reference standard inventory.

Products manufactured at Dalton are fully documented through the use of batch records to provide traceability of materials used, equipment utilized and work performed — all backed by a comprehensive Certificate of Analysis.

Dalton's quality credentials include a Health Canada Establishment License for drug testing and manufacturing, which carries reciprocity with Australia and the EU. Dalton's facilities are also approved by the Canadian Standards Council, and our quality system incorporates both cGMP and GLP requirements.

Dalton Steroid Standards and Impurities

The following is a list of our current offering of steroid standards and impurities. If you are looking for molecule you don't see here, please contact us. We may be able to make it or add it to our catalogue.

Dalton offers a wide range of standards and impurities in addition to the steroid compounds listed here. They include Cannabinoids, Opioids, Glitazones, Coelenterazines, Natural Products, Nucleosides, Phosphoramidites, Nucleic Acids, Building Blocks, Heterocycles, Labelled Compounds, Fentanyl salts, Metabolites and more. Please visit www.dalton.com under Products for the most current and complete list.
